

BUILD TO CHART

Keep Hunks in the warmers at peak Grab and Go times in your store by using this Build to Chart. Completing a chart for each day of the week can help employees cook pizzas at the right time and maximize your profits from Hunk sales.

USE THE BUILD TO CHART TO MAXIMIZE GRAB AND GO EVERY DAY

- Pay attention to the types and quantities of Hunks customers purchase throughout the day for each day of the week. Ask your customers what types of pizzas they'd like to see in the warmer during each part of the day. Your traffic and Hunk sales may differ from weekday to weekend.
- You can use the Sales and Waste tracking sheet to track how many and what types of pizzas are sold throughout the week.
- Print out 7 Build to Charts, one for each day of the week. One option is to place each chart in a protective sleeve and use a dry erase marker to fill in and change as needed.
- Fill in the types and quantities of pizzas to cook for each hour of the day. Fill in this information for each of the 7 Build to Charts.
- Post these daily Build to Charts near the pizza shoppe or warmer and train staff to use the schedule as posted.
